

EasyLink® E-mail to Fax Service E-mail and Fax are One

EasyLink E-mail to Fax Service uses your existing e-mail system and network technology to send faxes over the Internet. There's no hardware to deploy, software to install, or training to conduct. By leveraging your existing network infrastructure, you can merge Internet fax with e-mail in one system – providing the lowest cost of faxing imaginable.

Service Overview

EasyLink E-mail to Fax Service is an e-mail-based Internet fax service that enables an unlimited number of users to send faxes right from their PCs by addressing an e-mail to the recipient's fax number. Most types of documents or files can be sent, including Microsoft Office, Microsoft Project, Lotus SmartSuite, Corel, Visio, HTML, RTF, TIFF, PDF, PostScript and more.

Easy to Outsource

All document conversion and delivery is handled within the EasyLink Services Message Delivery Platform. This makes it easy for IT departments to completely outsource their fax applications and slash messaging costs by freeing the enterprise from purchasing, deploying, and managing its own costly fax infrastructure.

So simple you can start faxing immediately

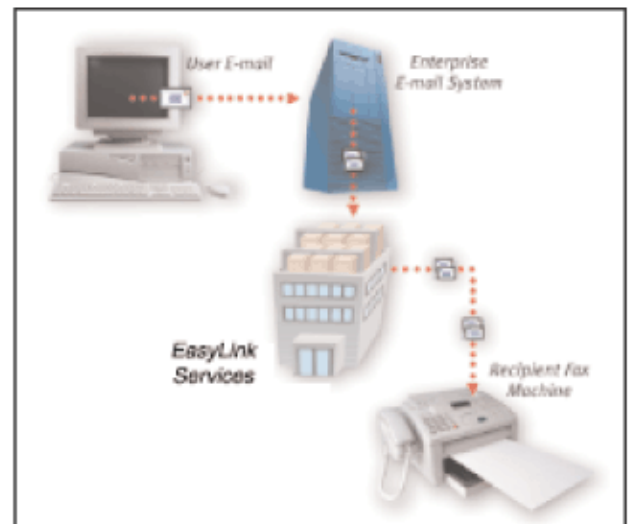

Because EasyLink E-mail to Fax Service works with your existing technology, there's no client or server software to install or hardware to deploy. Further, your users already know everything they need to start faxing immediately. If they can send an e-mail, they can send a fax.

So efficient, you can deploy it enterprise-wide

You already have the infrastructure you need to deploy desktop faxing enterprise-wide. Simply by registering user e-mail addresses with EasyLink Services, you can bring up entire workgroups or locations anywhere in the world - in a matter of minutes, not months.

So scalable, you'll never outgrow it

Because your documents are handled by the EasyLink Services Message Delivery Platform, EasyLink E-mail to Fax Service enables any number of users to simultaneously

The EasyLink Message Delivery Platform immediately delivers e-mail messages and attachments to the recipient's fax machine.

How It Works

To send a fax from an e-mail account, simply:

1. Create an e-mail message, which becomes the fax cover sheet.
2. Address the message to the recipient's fax number@faxmail.com.
3. Attach the document(s) and hit send.

The e-mail and its attachment get delivered as a fax to the recipient's fax machine anywhere in the world. The sender then receives an e-mail confirming the document's delivery.

EasyLink Desktop Fax Services

send an unlimited number of faxes. Why overspend on a fax server system that scales to a capacity you hardly ever need? When you need peak capacity – it's there with EasyLink E-mail to Fax at a fraction of the cost.

So economical, it saves time and money

Faxing from your existing e-mail system lowers your total cost of faxing by eliminating the need for additional fax machines or fax servers, dedicated telephone lines, supplies, and maintenance. For users it means less wasted time at the fax machine. Finally, faxing through the EasyLink Services Message Delivery Platform can also reduce your long distance costs.

Combine Fax to E-mail Service with E-mail to Fax Service for a complete messaging solution

Adding Fax to E-mail Service to E-mail to Fax Service lets you deliver a complete inbound and outbound fax capability across the entire enterprise without adding hardware, software or retraining users. Users simply give out their EasyLink fax number and they can receive faxes in their e-mail. Users will appreciate sending and receiving faxes from the application where they spend most of their time – their e-mail.
