

EasyLink® PC to Fax Service Send Faxes Directly From Your PC.

Rise to a new level of efficiency and productivity simply by faxing fully formatted documents directly from your PC to any fax machine in the world.

Service Overview

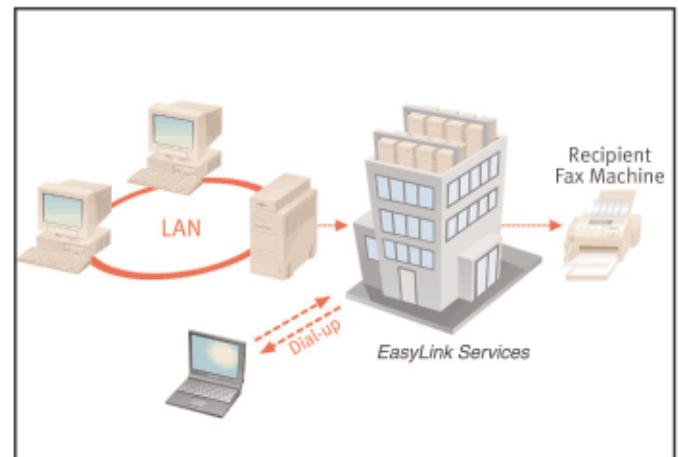

EasyLink PC to Fax Service desktop software instantly enables users to fax a document, whether text or graphics, directly from any Microsoft Windows application to any fax number in the world.

Fax from any Windows document

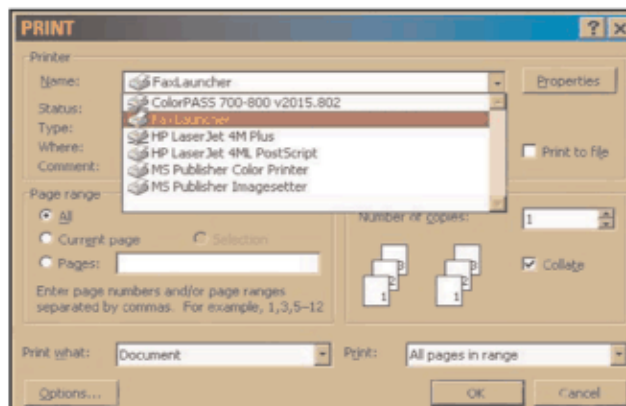

To instantly fax a document directly from any Windows application, users simply:

1. Select "Fax Launcher" from the print menu.
2. Enter the destination fax number in the FaxLauncher window and send.

The user receives e-mail confirmation for deliveries. On-line status query is also available.

The EasyLink Message Delivery Platform immediately delivers PC-generated documents to their designated fax machines.

Using EasyLink PC to Fax Service is as easy as printing a document.

Internet faxing is today's most convenient and cost effective way to fax

- Easy to install and use. EasyLink PC to Fax Service replaces expensive fax modems, boards and servers with client software that sends faxes right from your PC over the Internet. It's so easy that no user training is necessary. In fact, any user who knows how to print a document can easily send a fax.

How It Works

Once the EasyLink PC to Fax Service software is installed on the user's PC, it operates just like any standard Windows print driver. It appears as a configured printer in the Printers folder, and is listed on the Printer menu.

When a user wishes to fax a document from their PC, they simply choose "FaxLauncher" as the print driver and enter the destination fax number. The document is automatically converted to a fax format (TIFF file with RSA encryption) and is transmitted through the user's e-mail server or SMTP gateway to the EasyLink Message Delivery Platform, which delivers the fax. All text formatting and graphics are preserved.

EasyLink Desktop Fax Services

- Requires no additional equipment. Enterprise-wide desktop faxing is possible without adding hardware or changing your network.
- Saves time, money and labor. For users, Internet fax eliminates wasted time at the fax machine. And EasyLink PC to Fax Service also reduces company costs associated with fax equipment, supplies, maintenance and administration.
- Highest quality faxes. Direct from application, eliminates resolution loss from printing and faxing.
- FaxMerge. Is available as an enhanced feature in our award-winning software. Ideal for database marketing, invoicing and notification applications, this sophisticated service lets users easily send personalized broadcast faxes to 10 or 10,000 locations worldwide. FaxMerge documents can contain any combination of fonts, formatting, and graphics, customized with virtually unlimited data fields from any database.

How EasyLink PC to Fax Service compares to Fax Machines and Fax Servers

| Feature | EasyLink PC to Fax Service | fax server | fax machine |
